

Root Sense Quick Start Guide

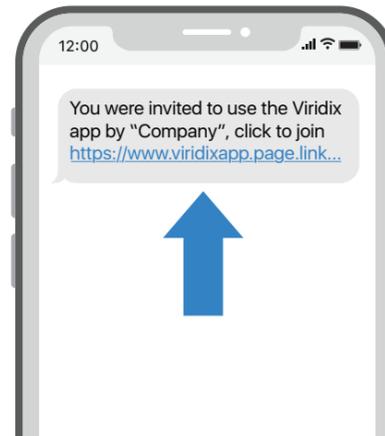

Welcome to Root Sense by Viridix

To get started, register or get an invitation from your organization.

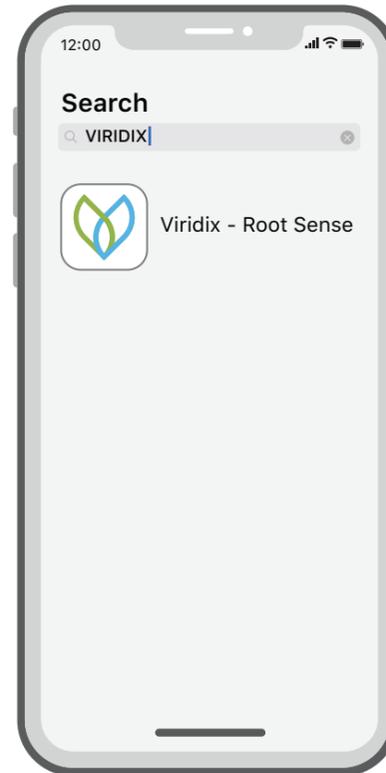

Go to www.viridix.com and register.

If you got an invitation by text message, click the link.

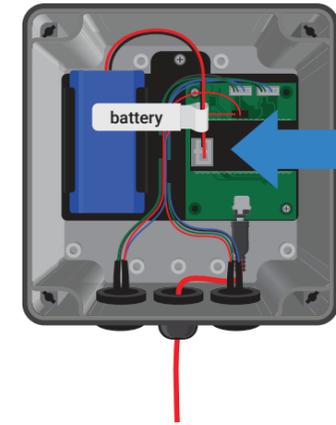

After you registered, download the Viridix app.

ASSEMBLY

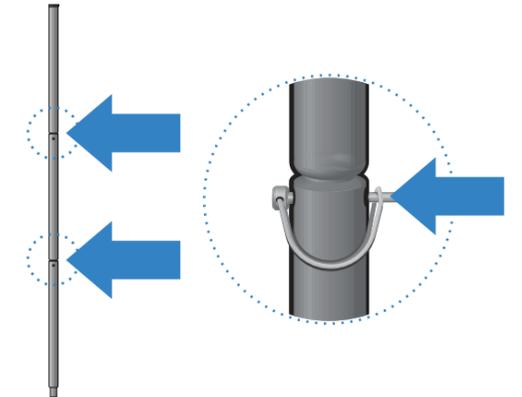

1 Connect the battery.

2 Close the Data logger by tightening the screws.

3 Connect the pole parts and lock them with locking pins.

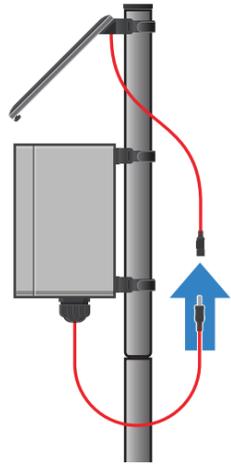

4 Connect the data logger and solar panel to the pole.

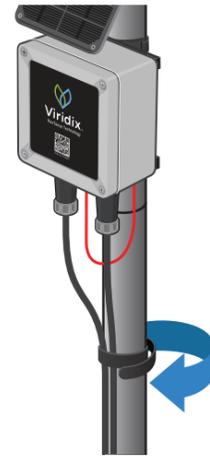

ASSEMBLY

SETUP

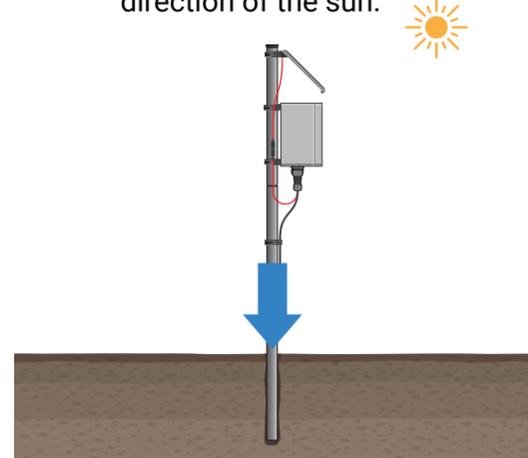

- 5 Connect the solar panel wire.

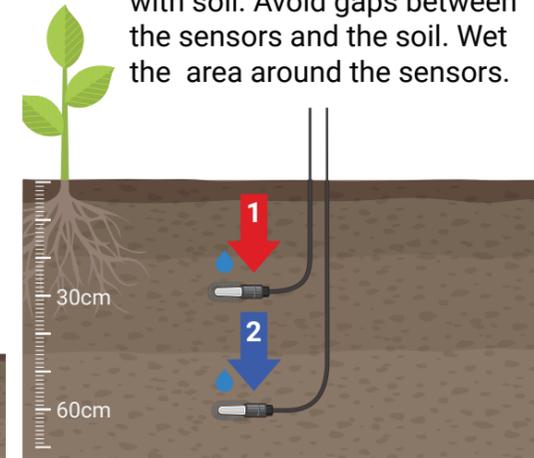

- 7 Lock the sensor wires into place with the wire clips.

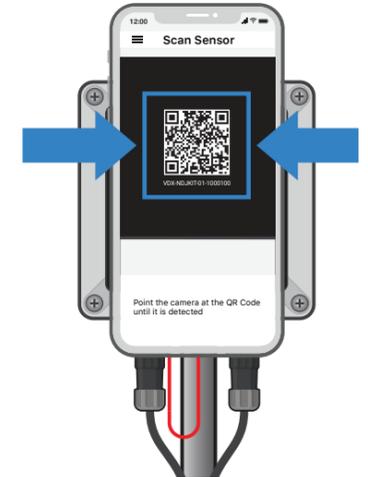

- 1 Insert the root stick into the ground with solar panel in the direction of the sun.

- 3 Place the sensors in the soil in the desired depths and cover with soil. Avoid gaps between the sensors and the soil. Wet the area around the sensors.

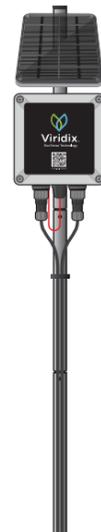

- 5 Scan the QR Code.

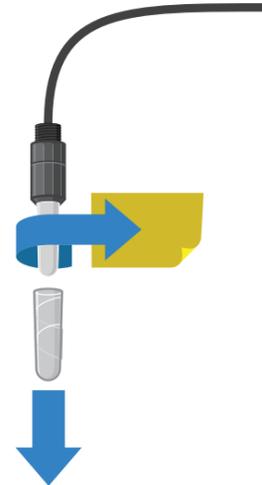

- 6 Twist sensor 1 (red) and then sensor 2 (blue) gently into the data logger.

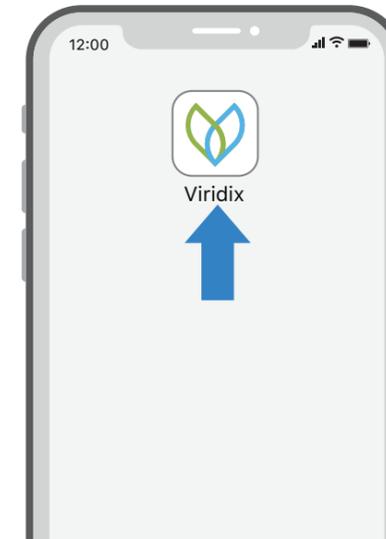

- Congratulations, your Root-Sense is ready to plant!

- 2 Unwrap the nylon from the sensors.

- 4 Open the Viridix App.

- 6 Fill in the required information for the sensor in the Viridix app.
